

Community Public Health Fund Guidance and Criteria

Community Grants

1 What is the purpose of the fund?

The **Community Public Health Fund** is a grant giving scheme that supports one of the key public health priorities to **reduce the risks of cardiovascular disease**, aiming to improve the quality of life for people living in the Carlisle area through community based and community led projects. Evidence shows that Carlisle district has high levels of hospital admissions for coronary heart disease. Consequently community public health funding is available for projects, across the Carlisle district, that aim to support people to make **informed healthy lifestyle choices** which will have a long term positive effect on the health and wellbeing of their group and/or community.

Further information about cardiovascular disease and associated risk factors can be found here: <http://www.nhs.uk/conditions/cardiovascular-disease> and Carlisle Health Profile here: http://fingertips.phe.org.uk/profile/health-profiles/area-search-results/E07000028?place_name=Carlisle&search_type=parent-area

2 What is on offer?

This year a fund total of £35,000 will be available for the Carlisle area. The funding is for projects that support the reduction of cardio-vascular admissions by focusing on the key risk factors: smoking, alcohol, diet and inactivity. Projects will support people to make informed healthier lifestyle choices.

Applications will be invited up to a maximum of £5,000 for projects delivered within or across the Carlisle area.

We would like to see applications that use the fund to attract additional funding opportunities, or that supports or complements other resources from public, private and voluntary organisations in supporting community public health aims.

3 Guidance and criteria for funding

All applications must meet the criteria set out in the document: **Community Grants: General Criteria, Guide to the Application Process and Terms and Conditions of Funding**.

Additional guidance and criteria for *Community Public Health Funding* are as follows:

3.1 Grants for *Community Public Health Funding* will only be awarded to community based projects and initiatives that support people to make informed healthy lifestyle choices which help to support a reduction in risk factors of cardiovascular disease. These could include interventions/projects that will aim to:

- Help people to stop smoking
- Support people to reduce their consumption of alcohol
- Increase physical activity and encourage people to take regular exercise
- Encourage/educate people to have a balanced diet and reduce salt intake
- Improve access to healthy food
- Support individuals who are overweight or obese to lose weight
- Adopt a holistic approach to health and wellbeing
- Build knowledge, skills and capacity in the local community to enable people to live healthier lifestyles

3.2 All applications for Community Public Health Funding must be submitted on the **Community Grant Application Form** and **Section 6: Additional Information for Community Public Health Funding Application** which is on page 3 of this document.

3.3 Applications will be welcome for new projects and to support existing worthwhile projects to continue or diversify. Those applications for support which demonstrate that they are closely aligned with the aims of public health will be given priority.

3.4 It is preferred that the grants will fund community groups, voluntary organisations or social enterprises; but, we will consider applications from other agencies if they can demonstrate that they will work closely with the local community and local assets

3.5 We will look favourably on projects that demonstrate an innovative approach to reducing the risks of cardiovascular disease and can be used as models of good practice in achieving the strategic aims of public health.

3.6 We would welcome applications that demonstrate social value, positive behavioural change and/or lead to sustainable improved health outcomes.

3.7 Funded activities may be one or more of the following

- A new activity
- Developing or improving an existing activity
- Extending the range or scale of an activity that the applicant already does such as offering an activity in a new area or with a different population/group
- Help to develop activities to sustain them in the future – such as training staff or volunteers (or both) to provide support or buying new equipment that will be used well in the future
- A pilot.

4 What are the desired outcomes?

4.1 Outcomes should show that people are making informed healthier lifestyle choices: reducing their consumption of alcohol; stopped smoking; managing weight (where previously there had been issues of obesity or overweight) or increased exercise.

4.2 Where possible outcomes should be measurable.

5 How do I apply for a Community Public Health Grant

Community Public Health applications can only be made via the Community Grant Application Form.

It is recommended that you contact your local Community Development/Area Support Team to discuss your application prior to submission:
