Exercise Beech - Scenario Part 1

Tabletop Flooding Exercise

It is 11:30 on Wednesday 18th November.

Cumbria has been experiencing prolonged spells of wet weather for several weeks. The Met Office have been warning of severe weather conditions due to arrive over Cumbria over the next 12 to 24 hours. Severe weather warnings have been issued by the Met Office and the Environment Agency.

Although most of Cumbria is experiencing rain, it is Central Cumbria that is forecast to experience severe and prolonged storm/gale conditions. The rest of Cumbria are also predicted to experience similar weather conditions. BBC Local Radio has been advising communities to be prepared, take all necessary precautions and to continue to tune to local radio for further updates.

Considerations

Think about the potential consequences and activation levels?

Communications - warning and informing.

Additional challenges on elements of your plan when the emergency services are under pressure elsewhere?

Exercise Beech - Scenario Part 2

Desktop Based Flooding Exercise

At the end of the midday news on BBC Radio Cumbria, the following statement is read out:-
“There is concern over the anticipated volumes of rainfall expected over the next 12-24 hours over parts of Central Cumbria. Large rainfall accumulations have already been observed and it is believed that catchments and rivers will not have fully drained before further rainfall arrives. There is therefore the potential for a large number of flood watches, flood warnings and some severe flood warnings to be issued. Current forecasts suggest a high risk of significant property flooding in the county.”

Considerations

Activation of the plan, and continuing to inform the community of the situation.

Vulnerable members of the community.

Forward planning.

Exercise Beech Scenario Part 3

Desktop Based Flooding Exercise

The weather is no starting to clear, but it is after 6pm and dark. Several properties in the local area have flooded, but the water is starting to recede and access will soon be reinstated to the area. Using the decisions made it is time to think about recovery.

Considerations

How to stand down the response.

Forward planning.
