Copeland District – Key Points

Population

- Largest proportion of male residents of all the districts in 2017 (50.1%; 34,388).
- Smaller proportion of residents aged 0-29 years in 2017 (31.8%) than in the North West (37.0%) and England (36.9%).
- Larger proportion of residents aged 75+ years in 2017 (9.8%) than in the North West and England (both 8.2%).

Ethnicity

- Larger proportion of White residents in 2011 (98.4%) than in the North West (90.2%) and England (85.4%).
- Smaller proportion of households where English is not the main language in 2011 (0.6%) than in the North West (2.9%) and England (4.4%).

Disability

- Proportion of residents with day-to-day activities limited a lot in 2011 (10.7%) is larger than in England (8.3%) and the North West (10.3%).

Religion

- Larger proportion of residents identifying as Christian in 2011 (78.9%) than the North West (67.3%) and England (59.4%); Copeland has the highest proportion of all Cumbria's districts.
- Smaller proportion of residents with no religious beliefs in 2011 (14.4%) than the North West (19.8%) and England (24.7%); Copeland has the lowest proportion of all Cumbria's districts.

Children and Young People

- Prevalence of overweight (including obesity) in Reception age children (age 4-5 years) in 2017-18 (27.1%) are statistically worse than England (22.4%); Copeland has the second highest proportion of all the districts.
- Levels of childhood obesity in Year 6 children (age 10-11 years) in 2017-18 (39.5%) are statistically worse than England (34.3%).
- The most frequently represented ethnic groups represented in Copeland's schools in the January 2018 School Census are: Any Other White Background; Any Other Mixed Background; White & Asian. These three ethnic groups appear in the top six in each district.
- There are a total of 73 different languages spoken in schools in Cumbria in the January 2018 School Census. In Copeland 1.5% of pupils do not have English as their first language, the second smallest proportion of all Cumbria's districts. Polish and 'Other' languages account for 91.0% of EAL pupils.
- In schools in Copeland in January 2018 there are over double the proportion of pupils in the 'severe learning difficulty' category (9.7%) than the County average (4.5%). There are significantly fewer in the 'specific learning difficulty' category (13.8%) than in the County as a whole (21.4%).
- Almost one quarter (23.6%; 215) of pupils with 'autistic spectrum disorder' are in schools in Copeland in January 2018.
- 29.5% (135) of pupils with a 'severe learning difficulty' are in schools in Copeland in January 2018.

Adults

- Second largest proportion of White British adult education students of all the districts in 2017-18 (93.6%; 486).
- Largest proportion of adult education students in 2017-18 aged 16-29 (26.4%; 137) of all Cumbria's districts.
- There are larger proportions of female adult education students in 2017-18 in all Cumbria's districts. In Copeland, female students made up 59.9% of the total (311), 1.5 times more than male students; this is the smallest proportion of all Cumbria's districts.
- Proportion of female adult social care service users in the Copeland Health & Social Care (HSC) district in March 2019 is 1.4 times more than male service users (57.9%; 566).
- One third of adult social care service users in the Copeland HSC district in March 2019 are aged 85+ (33.0%; 322).
- Largest proportion of known White adult social care service users in March 2019 (92.8%; 907) of all Cumbria's HSC districts.

Health

- Life expectancy at birth (male) 2015-17 (78.2 years) is worse than England (79.6 years).
- Life expectancy at birth (female) 2015-17 (81.5 years) is statistically worse than England (83.1 years).
- Two fifths of men in Copeland in 2018 (41.9%) are estimated to consume more than 4 units of alcohol per day, similar to the UK estimated average (41.3%).
- Around one third of women in Copeland (29.8%) are estimated to consume more than 3 units of alcohol per day in 2018, similar to the UK estimated average (28.9%).
- Smoking in pregnancy: the proportion of women smoking at the time of delivery in 2017-18 (13.7%; 86) is statistically worse than England (10.8%).

Housing

- The proportion of single person households aged 65+ in 2011 (13.2%) is similar to the national (England) proportion (12.4%), and the lowest proportion of all Cumbria's districts.

Economic activity and employment

- The proportion of males aged 16-64 out of work and claiming benefits at November 2018 (4.1%) is larger than the Great Britain proportion (3.1%) and the highest proportion of all Cumbria's districts.
- The proportion of females aged 16-64 out of work and claiming benefits at November 2018 (2.8%) is similar to the Great Britain proportion (2.8%) but the highest of all Cumbria's districts.
- The proportion of males aged 16-64 years in 2017-18 who are economically inactive (18.2%) is greater than the national (England) proportion (16.3%)
- The proportion of females aged 16-64 years in 2017-18 who are economically inactive (25.1%) is the second largest of all Cumbria's districts, although slightly smaller than the national (England) proportion (26.3%).

Hate Crime

- Copeland had a total of 226 recorded hate strands flagged on recorded incidents between January 2014 and November 2018.

- The most common hate strand flagged was racial hate, followed by sexual orientation, then disability, then religious and finally transphobic.

Further details regarding equality in the Copeland District can be found in the Appendix.
