

Topic Summary Briefing

Demography and Migration at Census Day 2021

Cumbria and Districts

Aim

On the 2nd of November 2022 the Office for National Statistics (ONS) released the first of a series of 'topic summaries' based on the results of the 2021 Census, which related to demography and migration at Census Day 2021. This briefing provides an analysis of the demography and migration topic summary for Cumbria and districts.

Important Notes

In this briefing any reference to 'national' figures refers to England & Wales. Furthermore, while district results are included in all figures, they are only noted within the narrative text accompanying the figures if they are within the top or bottom five of all Lower Tier Local Authorities (LTLAs) nationally. Any results relate to Census Day 2021 and any proportional change refers to change between Census Day 2011 and Census Day 2021. Finally, all Census results vary considerably across Cumbria's wards and LSOAs, sub-district level mapping and profiles will be provided via the Cumbria Observatory website (please see Further Information section).

Key Points

Population:

- Cumbria's usual resident population was 499,800; a decrease of 100 people (-0.02%) since 2011 (national +6.3%).
- Three of Cumbria's districts experienced decreases in population; Copeland (-5%), Barrow-in-Furness (-2.4%) and Allerdale (-0.3%).
- Inversely, three districts in Cumbria experienced increases in population; Eden (+4.1%), Carlisle (+2.3%) and South Lakeland (+0.8%).
- Copeland had the 4th greatest proportional decrease in population nationally.
- Cumbria was the 2nd largest and the 5th least densely populated Upper Tier Local Authority (UTLA) nationally.
- Eden was the least densely populated of all LTLAs nationally.

Age:

- Compared to the national average, Cumbria had an older age profile; lower proportions of younger residents and higher proportions of older residents.
- South Lakeland had the 4th smallest proportion of 0-14 year olds nationally, while Eden had the 4th greatest proportion of 45-59 year olds.
- Numbers of 0-14 year olds in Cumbria decreased (-3.7% vs. +4.7% nationally),
- Numbers of 15-64 year olds in Cumbria also decreased (-4.9% vs. +3.3% nationally), Copeland had the 5th greatest proportional decrease nationally (-10.6%).
- Numbers of residents aged 65+ in Cumbria increased (+18.3% vs. +20% nationally).

Sex:

- When compared to the national average, Cumbria had similar proportions of males and females.
- Copeland had the 3rd greatest decrease in numbers of females nationally.

Legal Partnership Status

- Of Cumbria's usual residents aged 16+ the greatest proportion were married or in a registered a civil partnership (48%).
- When compared to the national average, Cumbria had a lower proportion of residents who had never married or registered a civil partnership and higher proportions of residents who were married or in a registered a civil partnership, residents who were divorced or formerly in a civil partnership that was legally dissolved and residents who were widowed or the surviving partner from a civil partnership.
- Eden had the 4th greatest proportion of residents who were married or in a registered a civil partnership nationally.
- The number of residents in Cumbria who had never married or registered a civil partnership increased (+13.6 vs. national +17%).
- The number of residents in Cumbria who were divorced or formerly in a civil partnership that was legally dissolved also increased (+3% vs. national +7.9%). However, Barrow-in-Furness had the 4th greatest decrease nationally.
- The number of residents in Cumbria who were married or in a registered a civil partnership decreased (-4.9 vs. national +1.8%). Copeland and Barrow-in-Furness had the 2nd and 4th greatest decreases nationally.
- The number of residents in Cumbria who were separated decreased (-3.6% vs. national -9.2%).
- The number of residents in Cumbria who were widowed or the surviving partner from a civil partnership decreased (-9.2% vs. national -6.3%).

Country of Birth

- The greatest proportion of Cumbria's residents were born in the UK (95.2%).
- The greatest proportions of Cumbria's residents born in non UK countries were born in EU 14 countries, EU8 countries and the Middle East and Asia; all 1% each.
- When compared to the national average, Cumbria had a much lower proportion of residents born in non UK countries (Cumbria: 4.8%, national 16.8%), with Copeland having the 3rd smallest proportion nationally.
- The number of residents born in non UK countries increased substantially both nationally and at a county level (Cumbria +29%, national +33.5%). However, Copeland had the 4th greatest proportional decrease nationally.
- The most common non UK country of birth for usual residents in Cumbria was Poland.
- The greatest proportion of Cumbria's residents born in non UK countries arrived since 2011 (42.2%).
- The greatest proportion of Cumbria's residents born in non UK countries were aged 15-29 years on arrival in the UK (40.7, vs. 47.7% nationally).
- Compared to the national average, Cumbria had a greater proportion of non UK born residents who were aged 0-14 years on arrival in the UK (31.2% vs. 25% nationally).

Households

- Cumbria had 228,900 households; an increase of 6,900 households (+3.1% vs. national +6.1%).
- The greatest proportion of Cumbria's households were 'one person households aged under 66' (18.2%), followed by 'one person households aged 66+' (15.6%).
- When compared to the national average, Cumbria had higher proportions of the following household types: one-person aged 66+; one person aged under 66; one family all aged 66+; and married or civil partnership couples with no children.
- Inversely, Cumbria had lower proportions of: married or civil partnership couple households with dependent children; lone parent households with dependent children; other household types with dependent children; and other household types with non-dependent children.
- Eden and South Lakeland had the 3rd and 4th smallest proportions of lone parent households with dependent children nationally, while South Lakeland also had the 3rd smallest proportion of 'other types of households with dependent children'.
- Allerdale and Copeland had the 2nd and 5th smallest proportions nationally of 'other household types without dependent children'.
- Both nationally and in Cumbria numbers of one person households aged 66+, one family households all aged 66+, all cohabiting couple household types, and lone parent households with non-dependent children increased.
- Eden had the 2nd greatest increase nationally in cohabiting couple households with non-dependent children. However, Carlisle had the 2nd smallest increase nationally in lone parent households with non-dependent children.

- Both nationally and in Cumbria married or civil partnership couple households with dependent children and without children, and other household types with no dependent children decreased.
- Copeland and Barrow had the 2nd and 5th greatest decreases nationally in married or civil partnership couples with dependent children, while Copeland had the greatest decrease nationally in other household types with no dependent children.
- Copeland had the 4th greatest decrease nationally in other household types with dependent children.

Deprivation Dimensions

- 50.2% of Cumbria's households were classified as deprived in at least one deprivation dimension.
- When compared to the national average, Cumbria had a slightly lower proportion of households deprived in at least one dimension (national 51.7%).
- The number of households that were deprived in at least one or more dimension decreased in Cumbria (-8.8%); this decrease was greater than the national average (-4.9%).

Background

Every 10 years the Office for National Statistics (ONS) carries out a census to find out more about the population of England & Wales and the make-up of local communities. The most recent census took place on Sunday the 21st of March 2021. The results of the Census are used to plan for, and allocate resources to, services such as transport, healthcare and education. Census data on population also informs decisions about the allocation of local authority funding.

Census results require significant quality assurance work to ensure accuracy, including adjustment for people who have not completed the Census questionnaire. 2021 Census results are being released in three phases. The ONS began the second phase of 2021 Census results on Wednesday the 2nd of November 2022 by releasing the first of a series of datasets grouped by theme, known as topic summaries. The first topic summary relates to demography and migration. The following briefing provides an analysis for Cumbria and districts based on the on the 2021 Census Demography and Migration Topic Summary.

Population

Figure 1: Resident Population at Census Day:

Total Population (Usual Residents)

Area Code	Area Name	2011 Population	2021 Population	2011-2021 Numerical Change	2011-2021 Proportional Change

Source: 2021 Census, Office for National Statistics, figures may not sum due to rounding.

Cumbria was the 2nd largest Upper Tier Local Authority (UTLA) nationally, covering an area of 6,750 KM2. With an average population density of 74 people per KM2, Cumbria was the 5th least densely populated UTLA nationally (national average 395 people per KM2). Population density varied considerably across Cumbria's districts; from 26 people per KM2 in Eden to 865 people per KM2 in Barrow-in-Furness. Eden was the 2nd least densely populated LTLA nationally.

Of the households in Cumbria, the greatest proportion were 'one person households aged under 66' (18.2%), followed by 'one person households aged 66+' (15.6%).

When compared to the national average, Cumbria had higher proportions of the following household types: one-person aged 66+; one person aged under 66; one family all aged 66+; and married or civil partnership couple with no children. Inversely, Cumbria had lower proportions of: married or civil partnership couple households with dependent children; lone parent households with dependent children; other household types with dependent children; and other household types with non-dependent children.

Eden and South Lakeland had the 3rd and 4th smallest proportions of lone parent households with dependent children nationally, while South Lakeland also had the 3rd smallest proportion of 'other types of households with dependent children'. Finally, Allerdale and Copeland had the 2nd and 5th smallest proportions nationally of 'other household types without dependent children'.

Source: 2021 Census, Office for National Statistics, figures may not sum due to rounding. *Due to changes in pension age, these categories are compared with those aged 65+ in 2011.

Both nationally and in Cumbria numbers of one person households aged 66+, one family households all aged 66+, all cohabiting couple household types, and lone parent households with non-dependent children increased. Eden had the 2nd greatest increase nationally in cohabiting couple households with non-dependent children. However, Carlisle had the 2nd smallest increase nationally in lone parent households with non-dependent children.

Both nationally and in Cumbria married or civil partnership couple households with dependent children and without children decreased, as did other household types with no dependent children. Copeland and Barrow had the 2nd and 5th greatest decreases nationally in married or civil partnership couples with dependent children, while Copeland had the greatest decrease nationally in other household types with no dependent children. Furthermore, Copeland had the 4th greatest decrease nationally in relation to 'other household types with dependent children'.

Deprivation Dimensions

Households in England & Wales were classified in terms of dimensions of deprivation, based on selected household characteristics. Specifically, households were deprived if they met one or more of the following four dimensions of deprivation:

- **Employment:** where any member of a household, who is not a full-time student, is either unemployed or long-term sick
- **Education:** no person in the household has at least five or more GCSE passes (grade A* to C or grade 4 and above) or equivalent qualifications, and no person aged 16 to 18 years is a full-time student
- **Health and Disability:** any person in the household has general health that is “bad” or “very bad” or has a long-term health problem
- **Housing:** the household’s accommodation is either overcrowded, with an occupancy rating of negative 1 or less (implying that it has one fewer room or bedroom required for the number of occupants), or is in a shared dwelling, or has no central heating.

Implications

As expected, the 2021 Census has identified many changes over the last decade in relation to demography and migration in Cumbria. The figures outlined within this briefing represent just a small proportion of the data that was collected by the 2021 Census. Cumbria Intelligence Observatory will coordinate relevant analysis of 2021 Census statistics for Cumbria. This analysis will be used to:

- Build a more detailed picture of Cumbria and its communities.
- Compare results with the profile of people who use council services to assess whether they are providing fair access to public services, taking steps where a group is experiencing inequalities or potential discrimination.
- Enable informed strategic planning.
- Inform planning and delivery of services including schools, health provision, transport and housing.
- Inform a wide range of statutory needs assessments.
- Support lobbying activities.
- Support third sector organizations in funding applications and advocacy.

Further Information

The ONS plan to release all the main 2021 Census results within two years of Census Day. Please check the Cumbria Intelligence Observatory website over the coming months for further 2021 Census briefings and statistics as results are published: <http://www.cumbriaobservatory.org.uk/>

For more information: Email: info@cumbriaobservatory.org.uk
