

Alfred Barrow ICC

Figure 1: Alfred Barrow ICC with Indices of Deprivation 2015

(c) Crown Copyright and Database Right, 2017 Ordnance Survey Licence Number 100019596

Key issues

- Older population is projected to increase; working age population projected to decrease in the district (Barrow-in-Furness)
- Levels of unemployment are worse than the national average
- Child development; GCSE achievement; childhood obesity; and deliveries to teenage mothers are worse than the national average
- Cancer incidence, in particular colorectal and lung, are greater than the national average
- Premature mortality (deaths under 75 years) are worse than the national average

Alfred Barrow ICC

- Hospital stays for alcohol related harm worse than national average
- Life Expectancy and Healthy Life Expectancy (in the district) below national average
- Elective hospital admissions for hip replacement above national average
- Greater % of patients on GP Registers with: hypertension; diabetes; asthma; and dementia than the national average
- Greater % of Adult Social Care service users than county average
- “Falls” call outs to NWS are above the county average

Key: Text in *blue* refers to *registered population*; text in black refers to *resident population*. Where possible, comparisons with South Cumbria have been included; as well as benchmarking data against the England average.

Table 1: Demographics, Alfred Barrow ICC

	ICC
<i>Registered Population (total combined GPs within ICC)</i>	27,372
Mid-Year Population, ONS 2015 (calculations based on % within ICC)	50,820
% 0-19 years	22.6%
% 15-64 years	62.5%
% 65+ years	20.5%
% 85+ years	2.5%
Black and Minority Ethnic (BME) Population (%)	1.8%
Population whose ethnicity is not 'White UK' (%)	3.2%
Proficiency in English (% of people who cannot speak English well or at all)	0.2%
Provision of 1 hour or more unpaid care per week (%)	11.9%
Provision of 50 hours or more unpaid care per week (%)	3.6%
