

# Nitty Gritty

"I've lost count of the number of parents and teachers who tell me how brilliant the Nitty Gritty Comb is."

Rebecca Abrams, *The Daily Telegraph*

'The Rolls Royce of nit combs'  
*The Guardian*

## Nitty Gritty Comb Prescription Details

Dear Doctor,

If you haven't prescribed the *Daily Telegraph* award-winning Nitty Gritty Comb before, the first one is on us.

We won't ever send you junk email... we hate spam! So if you'd like a sample Nitty Gritty comb for your surgery, just email [nhs@nittygritty.co.uk](mailto:nhs@nittygritty.co.uk) from your NHS account and we'll send you one free of charge to evaluate yourself, or to pass on to a patient, who we are confident will tell you just how well it works.

It's better for your patient, and better for your budget, than ANY other head lice treatment because it quickly and easily gets everything out – head lice, nits AND even 'live' eggs too – without using any nasty chemicals. It works brilliantly with any ordinary hair conditioner. And just one comb serves a whole family; so no multiple or repeat prescription as with liquid head lice treatments.

It conforms precisely with current NHS guidelines, which recommend 'wet combing' with a quality nit comb as the best method of head lice eradication. However, unlike liquid treatments or any other nit comb the Nitty Gritty Comb is designed and gets *everything* out.

It is listed in Section IX A of the NHS Drug Tariff in the Appliance section under sub-category:

Head Lice Device, Nitty Gritty NitFree steel nit comb with micro-grooved teeth.

The Nitty Gritty NitFree comb is also approved for prescription by Nurse Prescribers. ['Pediculosis (head lice)' is one of the conditions listed for which Nurse Prescribers are allowed to prescribe, under the guidelines on Nurse Prescribing in Part XVII.

Prescribing health visitors and pharmacists are also able to dispense the comb.

The PIP Code is 294 6366. (useful for the pharmacist)
